16 February 1978

REMINDER MEMORANDUM

Discuss with Frank Press  comments on the microwave problem.

25X1

- a. Nothing really is going \_\_\_\_\_.
- b. What he needs is a clear statement of our priorities beyond the government sector in Washington, San Francisco, and New York.
- c. He could have all the communications coming in and out of Washington brought in from microwave terminals about 100 miles away by cable. This would take less than a couple of years to do.
- d. The Congress is presently vulnerable.
- e. What he needs are directions on what we feel must be done. They can finance it and do it as long as they can go to the FCC and get a rate increase to pay for it.
